step 1: frame extraction

In [ ]:

```python
import cv2
import math
# input path to video
videoFile = str(input("Enter input to video:"))
# output path for frames
framesFolder = str(input("Enter output path for frames:"))
cap = cv2.VideoCapture(videoFile)
# find frame rate of video
frameRate = cap.get(5)
while cap.isOpened() :
#      current frame number
    frameId = cap.get(1)
    ret, frame = cap.read()
    if (ret != True) :
        break
    if int(frameId) % math.floor(frameRate) == 0 :
        filename = framesFolder + "/image_" + str(int(frameId)) + ".jpg"
#          cv2.imshow(filename, frame)
        cv2.imwrite(filename, frame)
cap.release()
print "Done!"
```

step 2.1: fetching captioning information and coordinate information form results to seperate .json file

In [13]:

```python
import json
import os
i = 0
for file1 in os.listdir('/Users/arin/Desktop/final_yr_project/frame_extract/citmo
    print(file1)
    s = json.load(open('/Users/arin/Desktop/final_yr_project/frame_extract/citmor
#      print(s)
    for imginfo in s['results'] :
        json.dump(imginfo, open('/Users/arin/Desktop/final_yr_project/frame_extra
        i = i + 1
```

```
results1.json
results2.json
results3.json
results4.json
results5.json
```

step 2.2 calculating (x1, y1) to (x4, y4) from x, y, h, w information

In [14]:

```python
import os
i = 0
for file in os.listdir('/Users/arin/Desktop/final_yr_project/frame_extract/citmor
```

```python
    s = json.load(open('/Users/arin/Desktop/final_yr_project/frame_extract/citmor
    l = []
    for crd in s['boxes'] :
        x1, y1 = crd[0], crd[1]
        h, w = crd[2], crd[3]
#           print('x1:{} y1:{} h:{} w:{}'.format(x1, y1, h, w))
        x2, y2 = x1 + h, y1
        x3, y3 = x1 + h, y1 + w
        x4, y4 = x1, y1 + w
        t = (x1, y1, x2, y2, x3, x3, x4, y4)
#           print('x1:{} y1:{} x2:{} y2:{} x3:{} y3:{} x4:{} y4:{}\n'.format(x1,y1,
        l.append(t)
    json.dump(l, open('/Users/arin/Desktop/final_yr_project/frame_extract/citmore
    print(l)
    print('-----------------------')
    i = i + 1
    l = []
```
